

# Welcome Screen

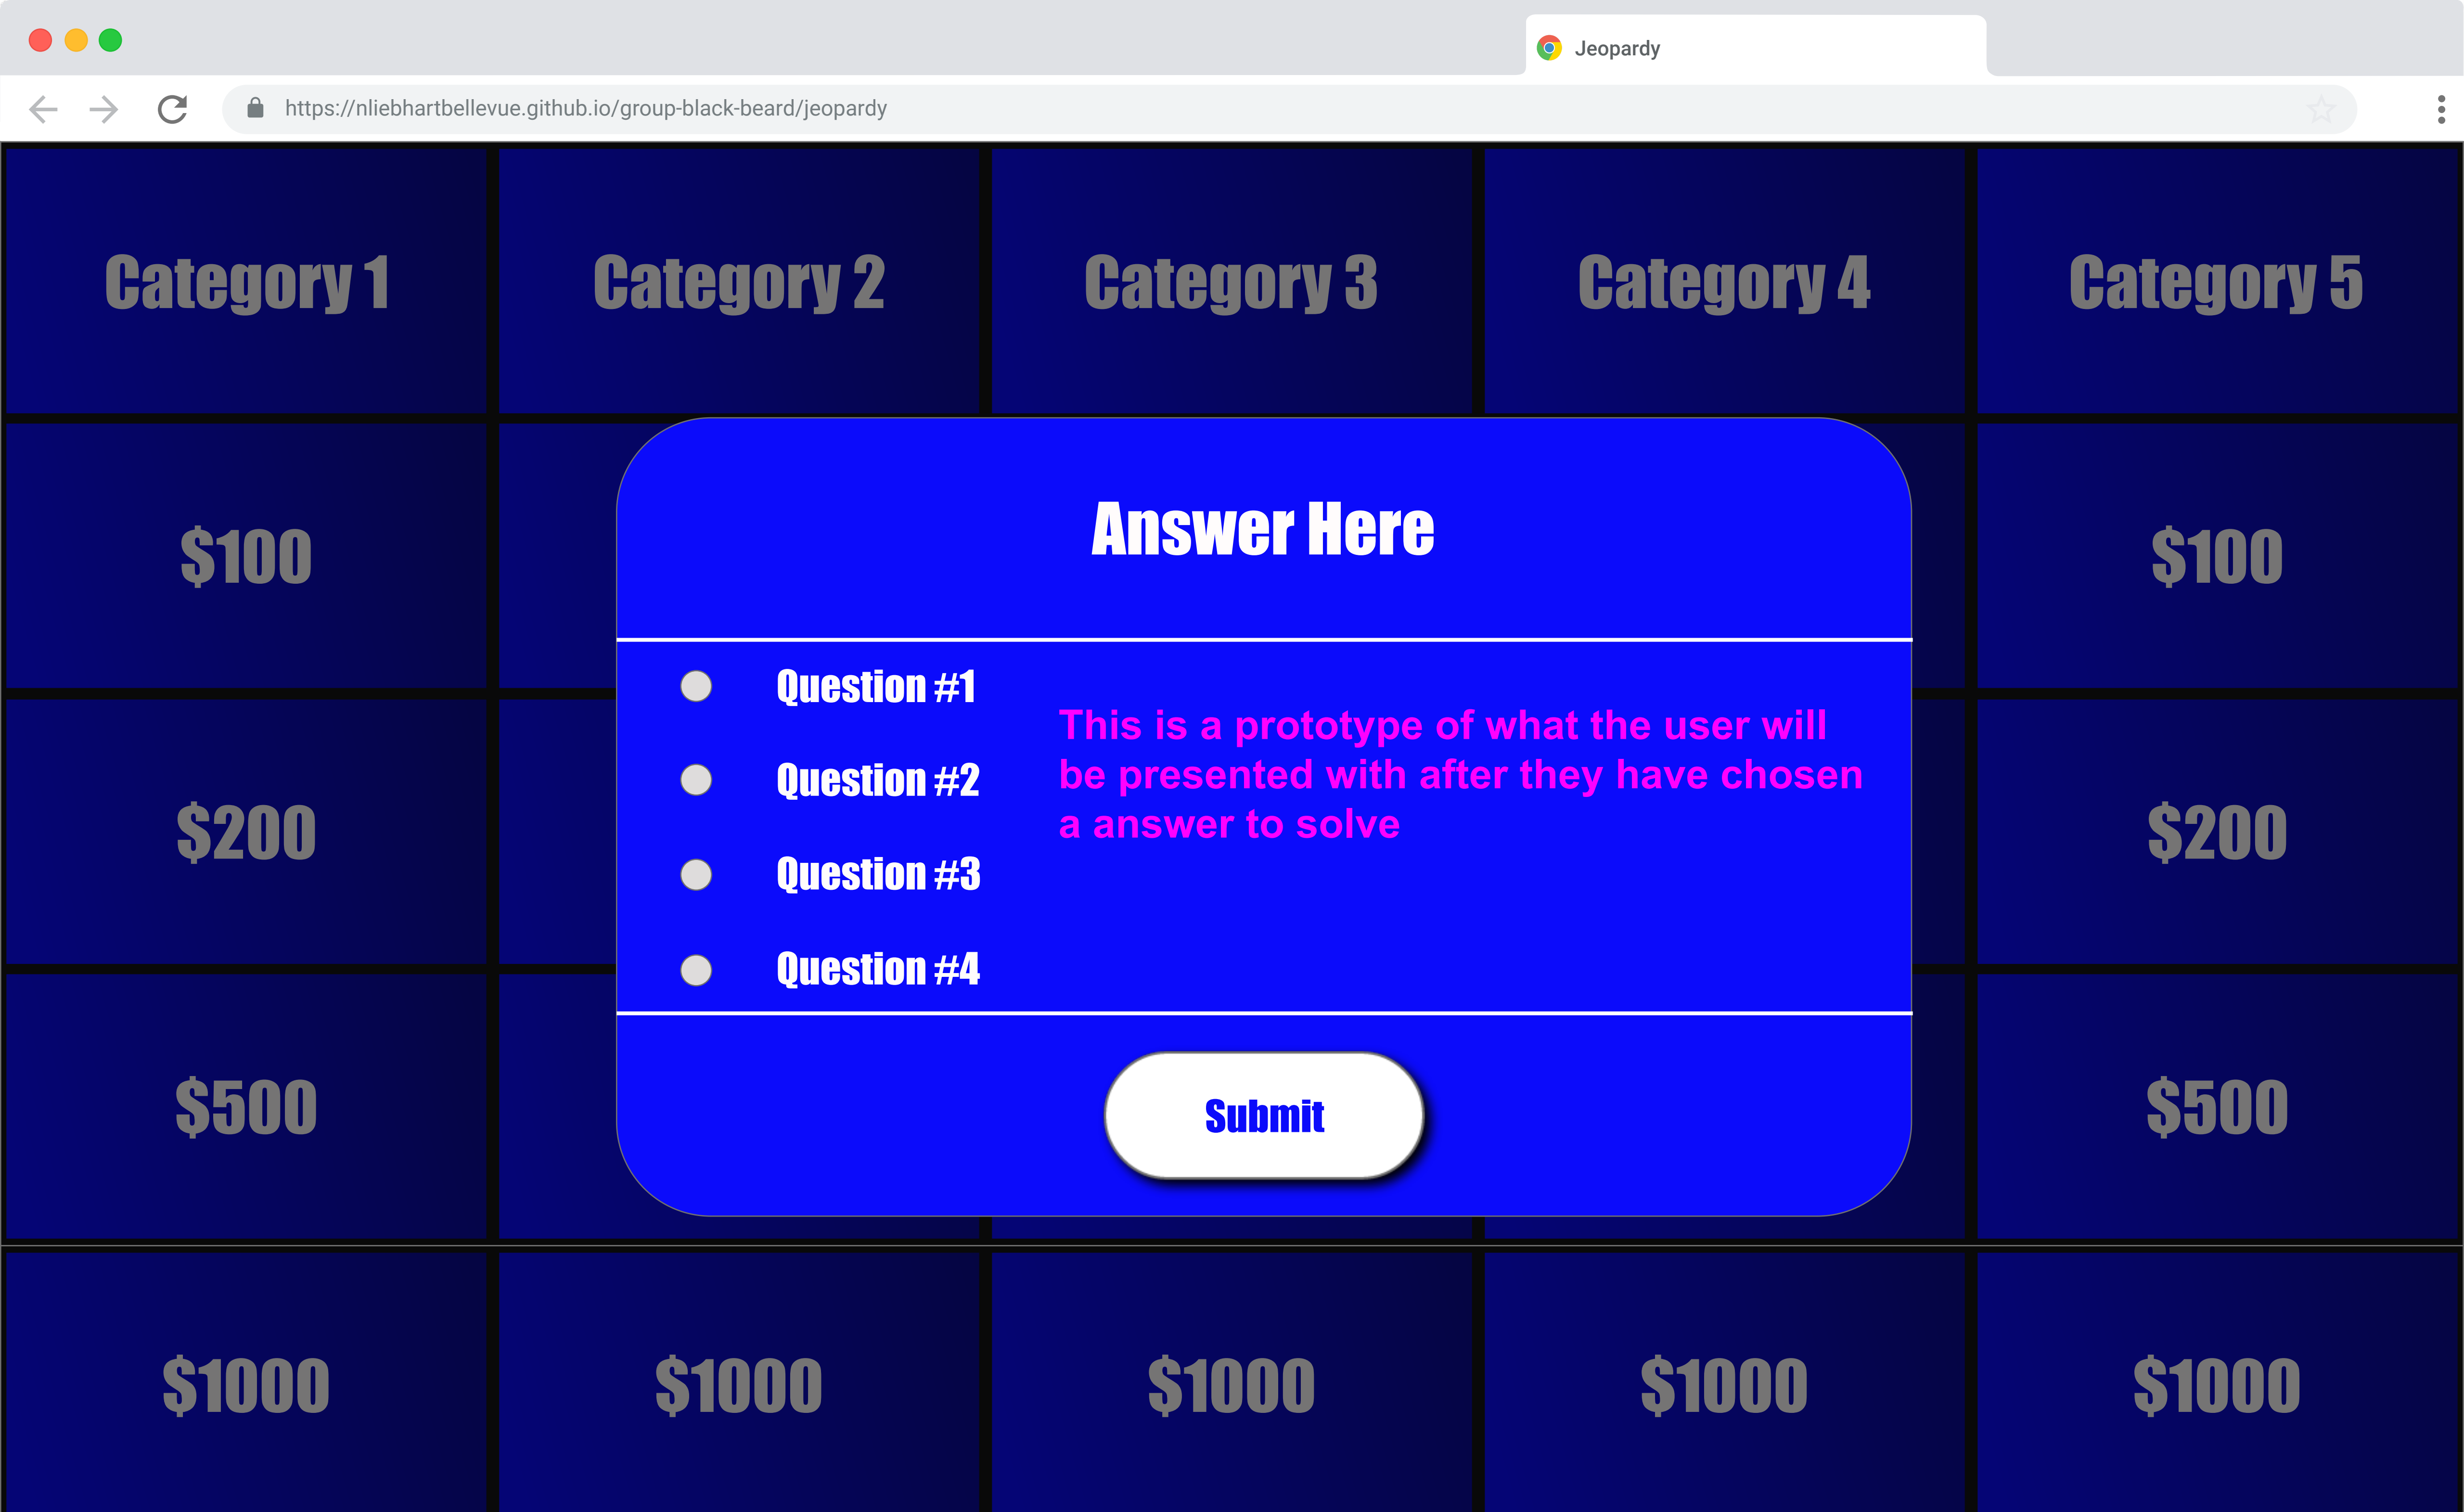

This prototype demonstrates what our welcome screen might look like. The title at the top middle, with a text input field for the user to enter their screen name. Below the input is a button that when pressed will start a new game. In the top right corner is a click-able icon that will take the user to the leader board.

This prototype demonstrates two possible layouts of the actual game board. The top one has five categories with five dollar amount indicating harder questions the higher the dollar value. The second board has two categories with five dollar amounts indicating harder questions the higher the dollar amount.

Category 1					Category 2					Category 3					Category 4					Category 5				
\$100					\$100					\$100					\$100					\$100				
\$200					\$200					\$200					\$200					\$200				
\$500					\$500					\$500					\$500					\$500				
\$1000					\$1000					\$1000					\$1000					\$1000				

This is another prototype of the game board, with five categories and four dollar amounts, once again the questions will get harder the higher the dollar amount

Answer Here

- Question #1
- Question #2
- Question #3
- Question #4

This is a prototype of what the user will be presented with after they have chosen a answer to solve

Submit

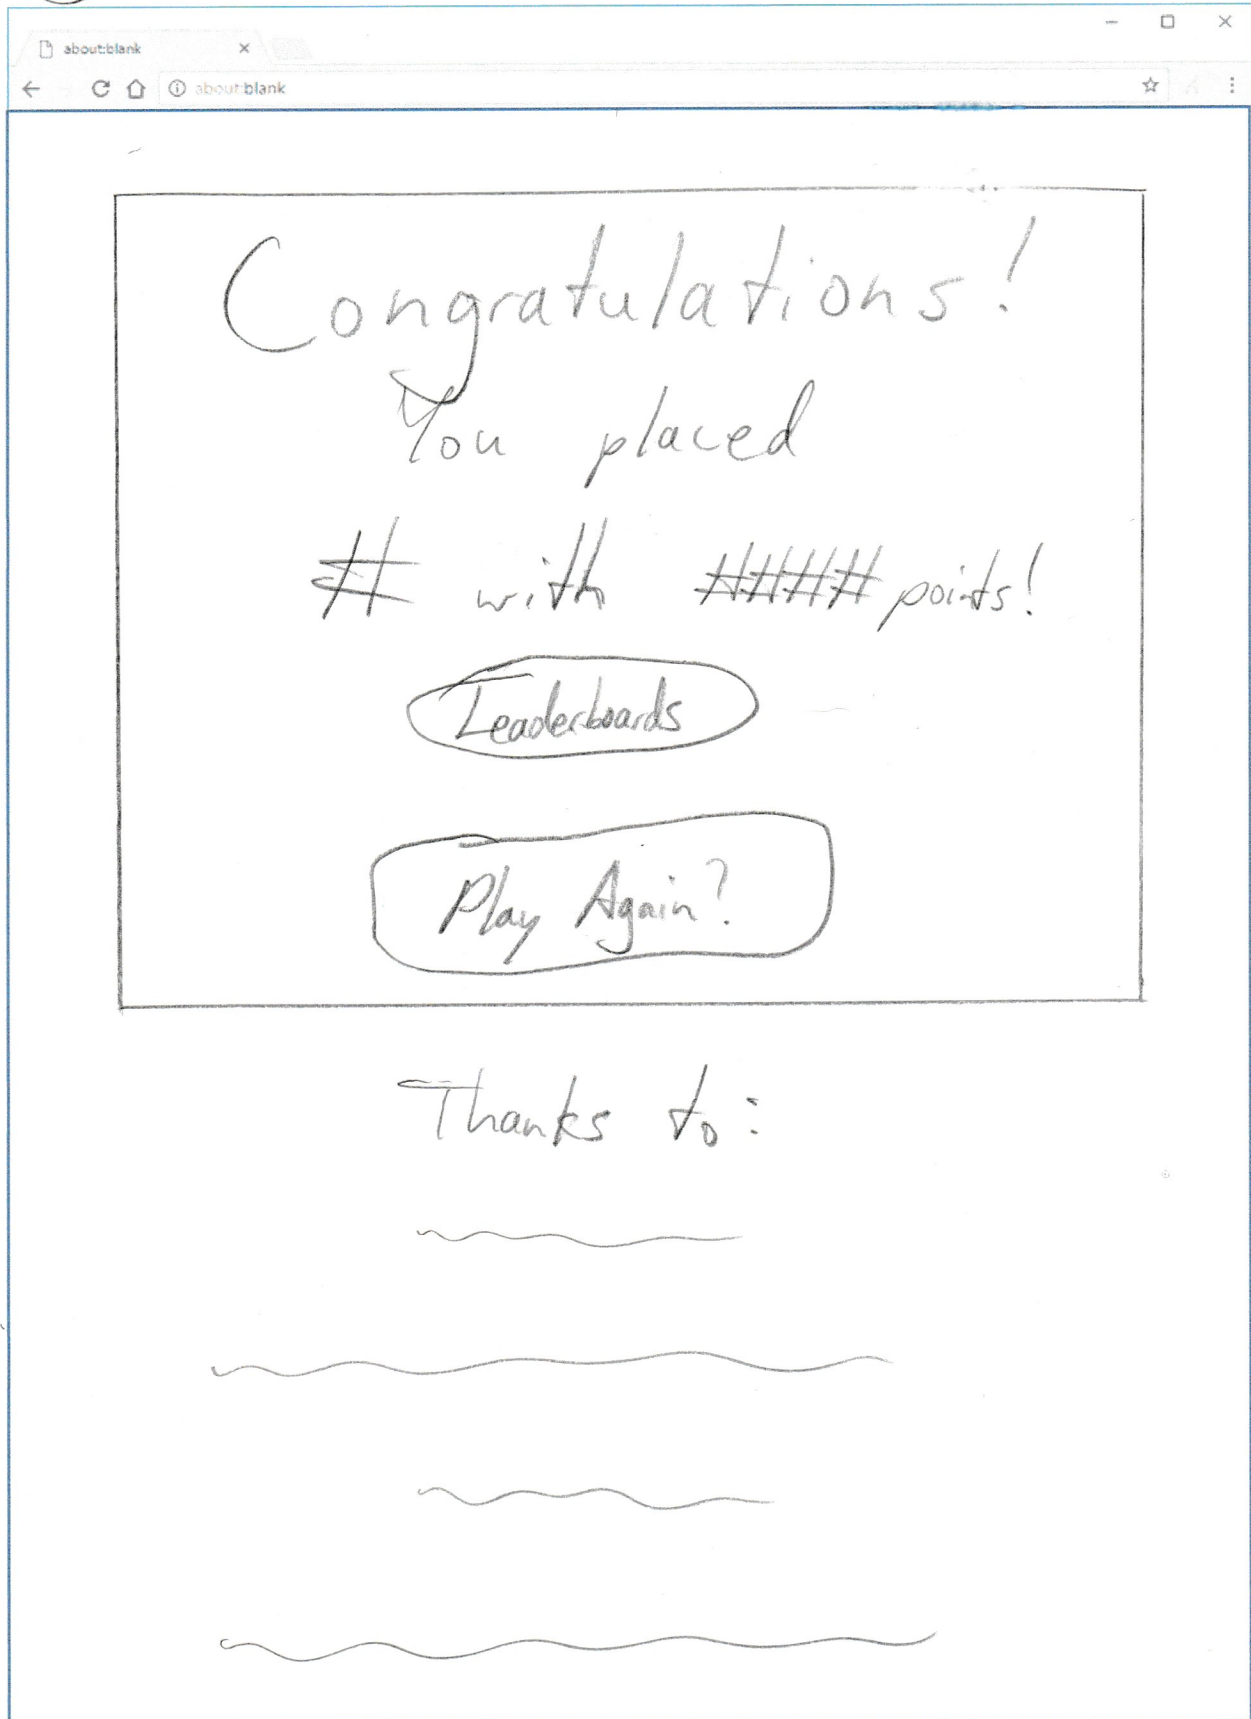

# Leader Board

- 1st Username \$amount
- 2nd Username \$amount
- 3rd Username \$amount
- 4th Username \$amount
- 5th Username \$amount

This is a  
prototype of  
what the  
leader board  
will look like

# End Screen

This is an example of what the user will be shown upon finishing the game
